### OUR PARISH MISSION

*We are a welcoming Christian family committed to Catholic values, responding to the call of Christ revealed in the diversity of human need. We practice a conscious, living, active faith in a community whose source of strength is the Eucharist.*

### **Miraculous Prayer to the Little Flower**

*O Little flower of Jesus, ever consoling troubled souls with heavenly graces, in our unfailing intercessions I place my confident trust. From the heart of our Divine Savior, petition the blessings of which I stand in greatest need.....Shower upon me your promised roses of virtue and grace, Dear St. Therese, so that swiftly advancing in sanctity and perfect love of neighbor, I may someday receive the crown of life eternal.  
Amen*

**PROFILE: CATHOLIC DIOCESE of KITUI, KENYA: 2<sup>nd</sup> special collection this weekend!**

For many years our two parishes have been assisting the Catholic Diocese of Kitui, Kenya by hosting a priest who has preached on the needs of the people there. Last year because of Covid no priest came; this year is the same. Instead we plan to show a video describing the needs of the diocese and take up a 2<sup>nd</sup> special collection: **Please make out checks to St. Therese Church with a note “Kitui Diocese.”**

The Catholic Diocese of Kitui, Kenya is a mission diocese that covers over 18,750 square miles. 26 parishes serve over one million people. The area both arid and semi-arid; with unreliable rainfall. Poverty levels are at 70% with malnutrition at 52%. The main source of livelihood is subsistence farming: crop & livestock; but due to drought there is a frequent cycle of famine and most people are on food relief.

The Kitui Diocese suffers from the Covid-19 pandemic, which has caused severe economic hardship. Bishop Joseph Mwangela of the Kitui Diocese has requested our assistance for many programs, including those that support orphans, family life ministry, and formation of seminarians/future priests.

## The Flimsy Evidence Behind the CDC's Push to Vaccinate Children

Marty Makary *WSJ.com* July 19, 2021

A tremendous number of government and private policies affecting kids are based on one number: 335. That is how many children under 18 have died with a Covid diagnosis code in their record, according to the Centers for Disease Control and Prevention. Yet the CDC, which has 21,000 employees, hasn't researched each death to find out whether Covid caused it or if it involved a pre-existing medical condition.

Without these data, the CDC Advisory Committee on Immunization Practices decided in May that the benefits of two-dose vaccination outweigh the risks for all kids 12 to 15. I've written hundreds of peer-reviewed medical studies, and I can think of no journal editor who would accept the claim that 335 deaths resulted from a virus without data to indicate if the virus was incidental or causal, and without an analysis of relevant risk factors such as obesity.

My research team at Johns Hopkins worked with the nonprofit FAIR Health to analyze approximately 48,000 children under 18 diagnosed with Covid in health-insurance data from April to August 2020. Our report found a mortality rate of zero among children without a pre-existing medical condition such as leukemia. If that trend holds, it has significant implications for healthy kids and whether they need two vaccine doses. The National Education Association has been debating whether to urge schools to require vaccination before returning to school in person. How can they or anyone debate the issue without the right data?
