### OUR PARISH MISSION

*We are a welcoming Christian family committed to Catholic values, responding to the call of Christ revealed in the diversity of human need. We practice a conscious, living, active faith in a community whose source of strength is the Eucharist.*

### **Miraculous Prayer to the Little Flower**

*O Little flower of Jesus, ever consoling troubled souls with heavenly graces, in our unending intercessions I place my confident trust. From the heart of our Divine Savior, petition the blessings of which I stand in greatest need.....Shower upon me your promised roses of virtue and grace, Dear St. Therese, so that swiftly advancing in sanctity and perfect love of neighbor, I may someday receive the crown of life eternal.  
Amen*

## **‘No climate emergency’ declaration signed by over 1,100 researchers**

[LifeSiteNews.com](#), Sept. 28, 2022 (reprinted from *The Daily Skeptic*)

The political fiction that humans cause most or all climate change and the claim that the science behind this notion is “settled” has been dealt a savage blow by the publication of a “World Climate Declaration” (WCD) signed by over 1,100 scientists and professionals. There is no climate emergency, say the authors, who are drawn from across the world and led by the Norwegian physics Nobel Prize laureate Professor Ivar Giaever. Climate science is said to have degenerated into a discussion based on beliefs, not on sound self-critical science. . . .

Particular ire in the WCD is reserved for climate models. To believe in the outcome of a climate model is to believe what the model makers have put in. Climate models are now central to today’s climate discussion and the scientists see this as a problem. “We should free ourselves from the naïve belief in immature climate models,” says the WCD. “In future, climate research must give significantly more emphasis to empirical science.”

. . . The declaration notes that the Earth’s climate has varied for as long as the planet has existed, with natural cold and warm periods. “It is no surprise that we are experiencing a period of warming,” it continues. Climate models have many shortcomings, it says, “and are not remotely plausible as global policy tools.” They blow up the effect of greenhouse gases, such as carbon dioxide, but ignore any beneficial effects. “CO2 is not a pollutant,” it says. “It is essential to all life on Earth. Photosynthesis is a blessing. More CO2 is beneficial for nature, greening the Earth; additional CO2 in the air has promoted growth in global plant biomass. It is also good for agriculture, increasing the yield of crops worldwide.”

. . . In addition, the scientists declare that there is no statistical evidence that global warming is intensifying hurricanes, floods, droughts and such-like natural disasters, or making them more frequent. “There is no climate emergency,” the declaration goes on. “We strongly oppose the harmful and unrealistic net-zero CO2 policy proposed for 2050,” it says, adding that the aim of global policy should be “prosperity for all” by providing reliable and affordable energy at all times.

The WCD is the latest sign that the “settled” fantasy surrounding climate change science is rapidly breaking down. Last year, Steven Koonin, an Under-Secretary of Science in the Obama Administration, published a book titled *Unsettled* in which he noted that, “The science is insufficient to make useful projections about how the climate will change over the coming decades, much less what our actions will be.” He also noted that rigidly promulgating the idea that climate change is settled demeans and chills the scientific enterprise, “retarding its progress in these important matters.”

## **Cdl. Brandmüller: German Synodal Path decisions a ‘mass apostasy from Holy Scripture and Tradition’**

(Dr. Maike Hickson, [LifeSiteNews](#), Sept. 19, 2022) — Cardinal Walter Brandmüller, a German prelate and church historian, has decried as “mass apostasy” the recent decisions taken by the September 8-10 German Synodal Path assembly in Frankfurt. The assembly, which consists of bishops and lay people, has approved of homosexuality, women’s ordination, and gender fluidity. A minority of bishops had, with a September 8 vote, rejected a heterodox document on sexuality, but then the leadership of the assembly decided to still make use of the rejected document and to put these dissenting bishops on the spot by forbidding secret ballots. The consequence was a collapse of the opposition on the second day, followed by the approval of above-mentioned topics. In an interview, Cardinal Brandmüller said he is reminded of “that rebellion of man against his Creator, as the fatal grasp for the fruit of the Forbidden Tree, which in the course of human history has been repeated again and again, and in ever new forms, and has resulted in streams of blood and tears. But what is really alarming and dismaying,” he said, “is that the consecrated and commissioned shepherds of the Church, the bishops, have in such large numbers apparently easily forgotten the oath they first swore before their ordination to the priesthood and then at their episcopal consecration before all the people – and before God’s Face.”
